# Air Traffic Flow Management and Performance dashboard legend

**Total Ground Delay.** Flight delays experienced when waiting (on the ground) for a GDP-assigned departure slot as result of predicted congestion at the arrival airport. Airlines may optimise GDP slots to minimise delays. Not included is ground delay for GA and Military.

**Arrivals.** Total arrivals at this airport during the day of the report

**Total Movements.** Total movements at this airport during the day of the report. Movements include arrival and departing aircraft.

**GDP Hours.** Total hours where the number of scheduled flights exceeded the predicted available capacity at this airport. This triggers a GDP to be put in place to ensure an orderly flow of flights into this airport. A GDP typically starts one hour ahead of a congested period and concludes one or two hours after.

**Ground Delay (Airservices-attributed).** Proportion of ground delay due to Airservices reduced service delivery. This includes Airservices staffing impact and technical issues of Airservices operational equipment.

**Ground Delay.** Total ground delay experienced by flights departing to this airport. Total ground delay includes factors outside of Airservices control, which include inclement weather and reduced airport usability.

**Cancellations (arrivals).** Number of flights scheduled to arrive at this airport determined to have been cancelled within 24 hours of departure.

**Cancellations (Other).** Number of scheduled flight cancellations outside of Airservices control, which include inclement weather, aircraft technical issues, and other airline decisions.

**Cancellations (Airservices-attributed).** Number of scheduled flight cancellations attributable to Airservices reduced service delivery.

**GDP Compliance.** Proportion of flights into this airport that departed compliant with their assigned GDP slot. Ensuring a flight depart compliant with its assigned GDP slot is the responsibility of the airline operating the flight.
