8 April 2026

Approval – Aeronautical Telecommunication and Radionavigation Service Provider

1 Application

This instrument applies to AIRSERVICES AUSTRALIA (the **operator**), ARN Number 202210 whose principal place of business is 25 Constitution Ave, CANBERRA, ACT 2601.

2 Approval

The operator is approved to provide the aeronautical telecommunication and radionavigation service described in Schedule 1 in accordance with its Operations Manual, subject to any conditions and limitations expressed in section 3 and Schedule 1.

3 Conditions

It is a condition of this approval that the holder may only conduct the kinds of telecommunication or radionavigation services in the areas, and during the times, if any, specified in Schedule 1.

4 Expiry

Unless varied, suspended, revoked or cancelled, this permission stops having effect at the end of 30 June 2026.

Schedule 1 to Part 171 ATEL/ANAV services approved to be provided by Airservices Australia

No: CASA.171.0013 Issue: 20

Listed services are detailed in the Airservices Facilities Baseline as referenced in the CASR Part 171 Operations Manual (171.110 – Technical Description)

It is a condition of this approval that the holder may only conduct the following kinds of telecommunication or radionavigation services in the areas, and during the times, if any, specified.

CASR-171 Service Classifications (Chapter 2 MOS Part 171)	Coverage	ICAO Defined Services	Airways Systems	Support Services (External)
AERONAUTICAL BROADCAST	National	Flight Information Service Aeronautical Broadcast	- National Aeronautical Information Processing System - Automatic Terminal Information Service Systems - Aeronautical En-Route Information Service (NB: Airservices is responsible for the receipt, distribution and transmission of information sourced from the Bureau of Meteorology). - VOLMET – HF Meteorological Service (NB: Airservices is responsible for the receipt, distribution and transmission of information sourced from the Bureau of Meteorology). Common Systems - Communications systems - Microwave radio links - Satellite ground stations - Terrestrial cabling - Multiplexers - Data networking systems - Voice Communication and Control Systems - Audio and Control Systems - ATC Consoles	- Public Telecommunication Networks - Telstra - Optus - SITA - Bureau of Meteorology - RVR – Runway Visual Range (Airport owners)
